

FAQS

WHAT MAKES NEOGEN PLASMA DIFFERENT FROM OTHER TREATMENTS?

The ground-breaking science behind NeoGen Plasma makes it different from other treatments in several important ways. NeoGen Plasma is the first and only treatment clinically proven to regenerate skin. 100% of the skin is treated, initiating regeneration deep below the surface, remodelling the entire skin architecture which replaces the damaged, wrinkled layers.

HOW LONG DOES THE TREATMENT TAKE?

NeoGen skin revitalization can be used to treat the entire face in around 40 minutes, or a smaller selected region in 5-10 minutes. This simple procedure is performed right here in our clinic. Depending on the treatment area, the condition of your skin and your desired outcome, one to six treatments may be recommended. Recovery time is related to the strength of the treatment performed. Following your treatment, you will see improvements which will become even more dramatic over time.

WHAT KIND OF IMPROVEMENT CAN I EXPECT?

Following low energy treatments, you will see improvements in skin texture and tone, and reduction of fine wrinkles. Following High Energy treatments, you will see these improvements as well as the reduction of deep wrinkles, acne scars and pigmentation marks. New, healthier, natural collagen growth will improve contours, tighten your skin, and enhance your overall appearance. Clinical studies show a continued improvement for as long as two years after treatment.

NITROGEN PLASMA SYSTEM

HOW DOES NEOGEN WORK?

While some treatments provide a modest improvement at the skin surface, clinically proven Neogen Plasma distinctively alters at, and below the surface. This creates the right conditions for continuing skin regeneration. The results are dramatic improvements to fine and deep wrinkles, acne scars, skin laxity and discolouration, as well as poor skin tone and texture.

Plasma energy is derived from excited nitrogen gas. During treatment plasma uniquely preserves the skin's outer layers which act as a natural protective dressing until your new healthy skin regenerates beneath.

The signs of ageing are most clearly seen in your skin. Fine lines, wrinkles, sagging, irregularity of skin pigmentation, broken capillaries leading to red blotches and dryness are all signs of the effects of the sun, wind, and time. Don't despair, now you can transform your skin!

YOUR SKIN WILL CONTINUE TO IMPROVE FOR UP TO 2 YEARS AFTER TREATMENT.

NeoGen works at and below the surface of the skin to modify the skin's architecture, generating new collagen and elastin fibres. This gives clinical improvements in skin tone, texture and laxity which are seen immediately. Improvements also continue up to one year after treatment. Results usually are immediate and progressive.
